

Fraser Basin Council

# The Fraser Basin Council

Working with you to advance sustainability in British Columbia

## Our Vision: Social well-being supported by a vibrant economy and sustained by a healthy environment

The Fraser Basin Council (FBC) brings people together to advance sustainability in British Columbia. Established in 1997, FBC is a charitable non-profit society led by a 38-member board of directors who come from the four orders of government (federal, provincial, local and First Nations), along with people from the private sector and civil society.

Over the past 28 years, FBC has delivered on a wide variety of collaborative initiatives to help people learn about sustainability, tackle complex issues and seek solutions. As our name suggests, our work has traditionally focused on the communities and watersheds of the Fraser Basin – but we work in other communities also, and many of our initiatives serve all of BC.

## Strategic Priorities

The Fraser Basin Council has three strategic priorities that frame our work:

- **Take Action on Climate Change**
- **Support Healthy Watersheds and Water Resources**
- **Build Sustainable and Resilient Communities**

Our multi-disciplinary staff work out of four regional offices and in other locations in BC to support sustainability programs, large and small. We regularly work in collaboration with governments, public and private agencies, businesses, industries, academic institutions, non-profits and other organizations, and with the many individuals participating in initiatives.

*If you are looking for a reliable program partner, connect with us!*

## Our Work

The Fraser Basin Council has a strong track record in facilitating processes and managing programs in areas such as community sustainability planning, disaster risk reduction, climate change mitigation and adaptation work, sustainable transportation, sustainability indicators and more. We are delighted to work with BC communities and organizations that are advancing sustainability through collaborative action.

# The Fraser Basin Council is your partner in sustainability

## Look at some of the initiatives we manage or support

- Plug in BC programs:
  - Public Charger Program
  - EV Advisor Service
  - CleanBC Go Electric Fleet Charging Programs
  - Emotive - EV education and events
  - Energy Peers in Indigenous Communities (EPIC) Network
  - Energy Efficiency Mentorship Program
  - Renewable Energy for Remote Communities
- First Nations Home EnergySave
- Retooling for Climate Change
- Disaster Risk Reduction
- Floodplain Mapping for High-Risk Communities in BC
- Extreme Heat and Water Scarcity Mapping
- Community Wildfire Roundtables
- Air Quality Roundtables
- Fraser Canyon Landslides & Impacts on Salmon research project
- Thompson-Shuswap Salmon Collaborative
- Salmon-Safe BC
- First Nations-BC Wildlife and Habitat Conservation Forum
- Forest Landscape Planning
- FBC Youth Program
- Collaborative watershed roundtables and planning projects
- Sustainability scholarships

**Social well-being supported by a vibrant economy and sustained by a healthy environment**

*Let's work together to make this vision a reality, for all of us here today and for future generations.*
